Reload to refresh your session. Blending the attributes of a highriding sport utility vehicle with a sporty subcompact coupe, the X90 was actually a convertible SUV. Suzuki began with the chassis and mechanical features of its 2door Sidekick, tossing out the back seat and blending in new styling. Rear drive and 4wheel drive models went on sale. Also standard were power windows and locks, tinted glass, power steering, and a tachometer. A separate trunk was part of the design.

Standard removable top roof panels allowed open air motoring, and also provided more protection from thieves than a conventional convertible top. A 4speed automatic transmission was optional in the 4wheel drive X90. The alarm and cassette unit could be dealer installed in 2WD models. Dealers also could install air conditioning and a CD player. No change was evident in its final outing. A 4speed automatic transmission was optional only in 4wheel drive models. The engine itself produces a loud, coarse growl when accelerating. Wind noise grows intrusive around the removable roof panels at speeds beyond 35 mph. There's a lot of bouncing and pitching on the highway, coupled with stiff, jarring reactions to bumpy pavement. Because it's tall and lightweight, too, the X90 is easily buffeted by crosswinds. Not really an SUV, the X90 is not meant for even gentle offroad driving, despite 4WD availability. And when you do, that action generates considerable noise and vibration. The pace slows considerably in an X90 with automatic, but noise levels are just as unpleasant. We averaged 23.5 mpg in a 4WD model with 5speed. Visibility to the front and sides is good, but wide rear pillars create large obstructions over both shoulders. Stereo controls are tiny, and nearly impossible to use in the dark. Storage space behind the seats is minimal, and doors are devoid of map pockets. The trunk is narrow and not particularly deep, and the spare tire eats up some of the potential luggage space. With the exception of Value, these numbers reflect how the vehicle compares against the universe of vehicles, not just against rivals in its class. Lower is better. Therefore, we recommend visiting websites that list used cars for sale to get a better idea of what a specific model is selling for in your area. Our editors test drive and thoroughly evaluate virtually every new car, truck, minivan, and SUV sold in America. The X90 debuted as a concept car at the 1993 Tokyo Motor Show.

The X90 was also imported into Europe. By the middle of 1997, the retail pricing had dropped by 25%. Vehicles for the North American market from 2014 onwards are sold exclusively in Mexico.
